Quadrant is a global manufacturer of plastic specialities in the form of semi-finished products or finished components. The group occupies leading positions in growing markets worldwide with high-quality high-performance plastics and plastic composites and focuses on long term industrial value creation.

Internal Planning Engineer

The Role:

The key function of this role located at our Todmorden site is to implement best practices for the production of engineered components and the provision of competitive quotations. Tasks will include:

- Estimating cycle-times and best methods for potential components.
- Creation of items and routings on company real time ERP (Enterprise Resource Planning) system.
- Reviewing costs and methods for accuracy and continuous improvement.
- Assisting sales Managers to provide technical support to internal operations.

Responsibilities will be to:

- Ensure cost effectiveness and efficiency of machining operations in meeting customer requirements
- Define potential methods for production, tooling and quality requirements
- Produce detailed schematics and drawings as required
- Provide technical support to solve production problems
- Improve existing efficiencies
- Manage sub contractors in the UK in line with meeting customer requirements
- Communicate effectively on technical issues with sales engineers, customer and suppliers
- Act as the coordinator of all orders for machined parts in design, technical and lead times
- Keep abreast of technological advance in machines and tooling

The successful candidate will be required to coordinate activities between UK internal sales operations and European Technical Centres' and to create detailed drawings and solid models as required.

Our Requirements:

Applicants must possess an Engineering Degree/HND (or equivalent) Time Served Mechanical Apprenticeship together with a minimum 5 years experience in a milling and turning machining environment.

Possessing proven CAD skills (solid modelling using solid Edge or similar) the successful applicant will be an effective communicator at all levels and be able to evidence the ability to effectively liaise with customers in the preparation of competitive parts quotations.

Engineering Project Management and/or Technical Engineering experience gained in a similar position would be an added advantage.

Applications to include comprehensive CV should be sent to The HR Manager, Quadrant EPP UK Ltd, Woodhouse Road, Todmorden, Lancashire, OL14 5TP or on line to david.johns@qplas.com
